

AUTHENTICATION

Swift API requests that require authentication must contain an X-Storage-Token authentication token in the request header. The token may be retrieved from RADOS Gateway, or from another authenticator. To obtain a token from RADOS Gateway, you must create a user. For example:

```
sudo radosgw-admin user create --uid="{username}" --displayname="{Display Name}"
```

For details on RADOS Gateway administration, see [radosgw-admin](#).

AUTH GET

To authenticate a user, make a request containing an X-Auth-User and a X-Auth-Key in the header.

SYNTAX

```
GET /auth HTTP/1.1
Host: swift.radosgwhost.com
X-Auth-User: johndoe
X-Auth-Key: R7UU0LFDI2ZI9PRCQ53K
```

REQUEST HEADERS

X-Auth-User

Description: The key RADOS GW username to authenticate.
Type: String
Required: Yes

X-Auth-Key

Description: The key associated to a RADOS GW username.
Type: String
Required: Yes

RESPONSE HEADERS

The response from the server should include an X-Auth-Token value. The response may also contain a X-Storage-Url that provides the {api version}/{account} prefix that is specified in other requests throughout the API documentation.

X-Storage-Token

Description: The authorization token for the X-Auth-User specified in the request.
Type: String

X-Storage-Url

Description: The URL and {api version}/{account} path for the user.
Type: String

A typical response looks like this:

```
HTTP/1.1 204 No Content
Date: Mon, 16 Jul 2012 11:05:33 GMT
Server: swift
X-Storage-Url: https://swift.radosgwhost.com/v1/ACCT-12345
X-Auth-Token: U0lCCC8TahFKlWuv9DB09TWHF0nDjpPElha0kAa
Content-Length: 0
```
