CEPH–CREATE–KEYS — CEPH KEYRING GENERATE TOOL

SYNOPSIS

ceph-create-keys [-h] [-v] [-t seconds] [–cluster *name*] –id *id*

DESCRIPTION

ceph-create-keys is a utility to generate bootstrap keyrings using the given monitor when it is ready.

It creates following auth entities (or users)

`client.admin`

> and its key for your client host.

`client.bootstrap-{osd, rgw, mds}`

> and their keys for bootstrapping corresponding services

To list all users in the cluster:

```
ceph auth ls
```

OPTIONS

--cluster
> name of the cluster (default 'ceph').

-t
> time out after **seconds** (default: 600) waiting for a response from the monitor

-i, **--id**
> id of a ceph-mon that is coming up. **ceph-create-keys** will wait until it joins quorum.

-v, **--verbose**
> be more verbose.

AVAILABILITY

ceph-create-keys is part of Ceph, a massively scalable, open-source, distributed storage system. Please refer to the Ceph documentation at http://ceph.com/docs for more information.
