## INSTALL CEPH DEPLOY

The ceph-deploy tool enables you to set up and tear down Ceph clusters for development, testing and proof-of-concept projects.

### APT

To install ceph-deploy with apt, execute the following:

```
sudo apt-get update && sudo apt-get install ceph-deploy
```

### RPM

To install ceph-deploy with yum, execute the following:

```
sudo yum install ceph-deploy
```
